

# Grants for Business

**New Zealand Trade & Enterprise and the Chamber of Commerce Southland invite you to –**

**Discover what grants and funding assistance are available to expand your business**

**Learn about the wider role of the NZTE, its many overseas offices and how to link into them**

Regional development and business development go hand in hand. New Zealand Trade and Enterprise supports regions as they develop sustainable strategies for economic growth and put them into action.

Alan Richardson, Regional Manager will cover products and services available, with specific attention on the various grants and funding assistance available to the businesses looking to expand. This covers domestic expansion and particularly where that expansion will lead into first time exporting or exporting to a new export market.

The evening will include brief presentations from local business on how they have applied and used Trade and Enterprise Grants. There will be an opportunity for questions and answers.
